

ART-LBL-02 Kit ID plate

PKG-EEG-015 Rev B
generated by tools/artwork_gen.py
2026-09-02 CC BY-SA 4.0

Size	80 x 40 mm
Substrate	Outdoor white polyester, permanent
Placement	Case lid exterior, upper left
Barcode	Code 128 subset B, 112 modules for a 7-character kit id, 0.643 mm per module at this width

Variable data -- these fields are NOT artwork and must be supplied before print

<<KIT_ID>>	KIT-<nnn>, the circulating asset, PKG-EEG-015 section 5.
<<UNIT_SERIAL>>	The electronics, PKG-EEG-015 section 5. Kit id and unit serial are recorded as a pair at despatch.

Notes

- `KIT-007` is set in 24 pt per section 4.2, which in this face is a 6.17 mm cap height.
- The Code 128 bar width falls out of the kit-id length. A longer kit id makes a narrower bar: re-run this tool for the id actually used and check the bar width against the printer's resolution.
