Variable data -- these fields are NOT artwork and must be supplied before print

Stephane van der Aa	SUPPLIED 2026-09-02. Substituted at generation.
Van Volxemlaan 208 bus 31	SUPPLIED 2026-09-02. Substituted at generation.
1190 Brussels	SUPPLIED 2026-09-02. Substituted.
Belgium	SUPPLIED 2026-09-02. Substituted at generation.
+32 493 70 16 01	SUPPLIED 2026-09-02. REG-EEG-012 Rev B section 3.5 requires a number that is answered by a person during the carrier's operating hours, not a voicemail box, and makes any change to it an ECO -- so the number is now under change control, not merely known.

Notes

- THIS LABEL CANNOT GO TO A PRINTER AS IT STANDS. The programme's postal address and telephone number appear nowhere in package v2.3, and this tool will not invent them: a wrong address on a case base is a kit that does not come back.
- The three languages are EN, FR and NL as section 4.2 requires. The FR and NL lines are written without diacritics so that a thermal-transfer printer with a reduced character set cannot drop a character silently; a printer that carries the full set may set them accented.
