

ART-LBL-04

Foam bay tags, nine off

PKG-EEG-015 Rev B
generated by tools/artwork_gen.py
2026-09-02 CC BY-SA 4.0

Size	60 x 12 mm
Substrate	Matt polyester, permanent
Placement	Bay rear wall at mid-depth, or the top face beside a deep well (section 2.3)
Quantity	9 per kit, one per Rev C bay

HELMET HM-01	HELMET HM-01 - cap 4.89 mm, 1 line(s), shown 1:1
HEADPHONES	HEADPHONES - cap 5.36 mm, 1 line(s), shown 1:1
POD-P1 ENCLOSURE	POD-P1 ENCLOSURE - cap 4.62 mm, 2 line(s), shown 1:1
BOOM MICROPHONE	BOOM MICROPHONE - cap 4.62 mm, 2 line(s), shown 1:1
SPARE CUPS + KEYLESS SPARES	SPARE CUPS + KEYLESS SPARES - cap 4.35 mm, 2 line(s), shown 1:1
SPARE CELL -- DEPOT ONLY, EMPTY IN CIRCULATION	SPARE CELL -- DEPOT ONLY, EMPTY IN CIRCULATION - cap 2.68 mm, 2 line(s), shown 1:1
CONSUMABLES	CONSUMABLES - cap 4.86 mm, 1 line(s), shown 1:1
EAR CLIPS + EMG LEADS	EAR CLIPS + EMG LEADS - cap 4.62 mm, 2 line(s), shown 1:1
CABLES + CHARGER	CABLES + CHARGER - cap 4.62 mm, 2 line(s), shown 1:1

Notes

- Legends are read out of the PKG-EEG-015 section 2.2 Rev C schedule at generation time and are not typed here, so a tag and the cut file that makes its bay cannot drift.
- The SPARE CELL tag carries the section 7 string, not the section 2.2 legend. Section 4.2 says the legends are identical to the schedule and section 7 says this one tag reads `SPARE CELL -- DEPOT ONLY, EMPTY IN CIRCULATION`. The section 7 form is obeyed because it is the one that carries safety information, and the collision is raised in PKG-EEG-015 section 9.
- THE SPECIFIED TAG CANNOT CARRY THE SPECIFIED TYPE. Section 2.3 asks for an 8 mm cap height on the 60 x 12 mm tag of section 4.2 and 9 of the 9 legends do not fit -- not even HEADPHONES. the
