

ART-LBL-07 Numbered tamper seal

PKG-EEG-015 Rev B
generated by tools/artwork_gen.py
2026-09-02 CC BY-SA 4.0

Size	90 x 20 mm
Substrate	Void-evident, removable
Placement	Across each case hasp
Quantity	Two per despatch, one per hasp, plus one carton security seal (PKG-EEG-015 section 6)

Variable data -- these fields are NOT artwork and must be supplied before print

<<SEAL_NUMBER>>	Serialised by the seal supplier. Both numbers are written on the despatch record and checked at goods-in (PKG-EEG-015 section 8).
-----------------	---

Notes

- The dashed centre line is the die instruction, not printed matter: the seal is cut where it crosses the hasp so that opening the case destroys it.
- SVC-EEG-013 Rev B section 1 compares all three seal numbers before the hasps are released, so the number must be legible after transit.
