Size	A5 landscape, 210 x 148 mm, laminated
Placement	Case lid wallet, packing-list line 6.4
Source	PKG-EEG-015 section 2.2 Rev C bay schedule and section 1.1 pocket column

ART-PACK-01 KIT PACKING LAYOUT

CASE-00 Rev C, layer 1 uppermost, sheet 516.0 x 390.0 mm, nine bays

PROVISIONAL - REPLACE WITH PHOTOGRAPH AT FIRST BUILD

A drawn layout, not a photograph. Call-outs are KPL-EEG-001 line numbers (PKG-EEG-015 section 1.1).

Notes

- This is a DRAWING, not a photograph. PKG-EEG-015 section 2.3 requires a photograph of the first Phase 1 kit at 300 dpi with call-outs numbered to the KPL lines, and allows a rendered layout marked PROVISIONAL until a kit exists. Section 9 open item 7 records that no such render existed; this is it.
- Bay outlines are at true relative scale on the 516.0 x 390.0 mm sheet. The call-outs are every packing-list line whose pocket column names that bay, so a line added to section 1.1 appears here on the next run.
- It shows layer 1 in plan. It does not show depth, and six of the nine bays hold parts that are not dimensioned anywhere in package v2.3 (section 2.2 and section 9 open item 1), so this drawing says where a part goes and not that it fits.
